For media and partners

Who we are, what we do and how we can work together. You are welcome to use the texts, facts and logos on this page when you write about Evolako.

IN BRIEF

Evolako in eight facts

What we do

Home charging for electric cars for people who live in apartment buildings: installation in a garage or parking space, a MID meter in START and ZGRADA (optional with a wallbox), document templates and monthly electricity billing.

Where we work

All over Serbia. The team is based in Belgrade and Novi Sad.

Packages

Installation only from 24.000 RSD · START 39.000 RSD · WALLBOX 11 kW from 94.000 RSD · ZGRADA from 96.000 RSD per space. Prices are final and include basic installation next to the distribution board; document templates are free for everyone.

Timelines

Home charging: an assessment for 2.990 RSD, credited toward the installation — 72 h in Belgrade, Novi Sad and Vojvodina; elsewhere we agree the date by message; installation in one working day. Companies and buildings: reply within 48 hours, assessment by arrangement. With a building assembly decision: 4–10 weeks.

Subscription

990 RSD a month, first 2 months 0 RSD, no contract commitment: billing, monitoring, priority service, a winter check-up and extended warranty. The kit works without a subscription too.

Electricity

Evolako does not sell electricity. Consumption is measured by a MID meter or by the charger itself, and the cost is billed at the price on the EPS bill, with no markup.

Warranty

The standard warranty is 2 years and applies without a subscription too. With a subscription, it lasts as long as the subscription.

Languages

We speak Serbian, Russian and English.

PARTNERSHIPS

How we can work together

Building managers and residents' associations

For a building we provide a technical description of the installation and templates for the residents' assembly: a draft decision, an agenda item and answers to residents' questions. The solution costs the building nothing: space owners pay for the connection, and each user pays for electricity by their own meter.

Companies and fleets

For company cars charged at employees' homes: a MID meter per space and a monthly consumption report for accounting.

Equipment makers and suppliers

Send offers, specifications and terms for wallboxes, meters and other equipment to hello@evolako.com.

Electric car dealers

A buyer who lives in an apartment building asks where they'll charge the car before buying. For buyers you refer, we offer a garage assessment — 72 h in Belgrade, Novi Sad and Vojvodina; elsewhere we agree the date by message — and an exact quote before they sign. Terms of cooperation are agreed individually.

Electricians

Installations are done by licensed electricians, to our standard, with our checklist and installation description. If you are a licensed electrician anywhere in Serbia and would like to work with us, write to us.

READY-TO-USE TEXTS

Texts for publication

Use and shorten them freely. The figures are as of 29.10.2026.

English

SHORT

Evolako installs home chargers for electric cars in apartment-building garages and houses — with a MID-certified meter (in START and ZGRADA, optional with a wallbox) and monthly electricity billing with no markup. The templates for the residents' assembly and the garage owner are free for everyone.

LONGER

Evolako solves electric car charging for people who live in apartment buildings. At a parking space or in a garage it installs a heavy-duty socket with a MID-certified meter or an 11 kW wallbox (MID meter optional), provides free document templates for the residents' assembly or the garage owner, and every month bills electricity at the price on the EPS bill, with no markup. Packages with basic installation next to the distribution board start at RSD 39,000 (final price), and installation takes one working day. Evolako works all over Serbia.

Srpski

SHORT

Evolako ugrađuje kućne punjače za električne automobile u garažama stambenih zgrada i kućama — sa MID brojilom (u START i ZGRADA, uz wallbox po izboru) i mesečnim obračunom struje bez marže. Šabloni za skupštinu i vlasnika garaže su besplatni za sve.

LONGER

Evolako rešava punjenje električnog automobila za ljude koji žive u zgradama. Na parking mesto ili u garažu ugrađuje pojačanu utičnicu sa sertifikovanim MID brojilom ili wallbox 11 kW (MID brojilo po izboru), daje besplatne šablone papira za skupštinu stanara ili vlasnika garaže i svakog meseca obračunava struju po ceni sa računa EPS-a, bez marže. Paketi sa osnovnom ugradnjom pored razvodne table koštaju od 39.000 RSD (konačna cena), a ugradnja traje jedan radni dan. Evolako radi u celoj Srbiji.

Русский

SHORT

Evolako устанавливает домашние зарядки для электромобилей в гаражах многоквартирных домов и в частных домах — с MID-счётчиком (в START и ZGRADA, к wallbox — по желанию) и ежемесячным расчётом за электричество без наценки. Шаблоны для собрания жильцов и владельца гаража бесплатны для всех.

LONGER

Evolako решает вопрос зарядки электромобиля для тех, кто живёт в многоквартирных домах. На парковочное место или в гараж устанавливается усиленная розетка с сертифицированным MID-счётчиком или wallbox на 11 кВт (MID-счётчик по желанию); Evolako даёт бесплатные шаблоны документов для собрания жильцов или владельца гаража и каждый месяц рассчитывает электричество по цене из счёта EPS, без наценки. Пакеты с базовым монтажом рядом со щитком — от 39 000 RSD (итоговая цена), установка занимает один рабочий день. Evolako работает по всей Сербии.
