For media and partners

Who we are, what we do and how we can work together. You are welcome to use the texts, facts and logos on this page when you write about Evolako.

IN BRIEF

Evolako in eight facts

What we do

Home charging for electric cars for people who live in apartment buildings: installation in a garage or parking space, a MID meter in START and ZGRADA (optional with a wallbox), document templates and monthly electricity billing.

Where we work

Belgrade and its surroundings, Novi Sad and Vojvodina.

Packages

Installation only from RSD 24,000 · START RSD 39,000 · WALLBOX 11 kW from RSD 94,000 (RSD 104,000 with a MID meter) · WALLBOX PLUS RSD 115,000 / 127,000 · WALLBOX PREMIUM RSD 155,000 / 195,000 with PowerBoost (MID meter +RSD 10,000) · ZGRADA from RSD 96,000 per space. All including VAT and basic installation next to the distribution board (up to 2 m of cable, RCD and breaker); other work is quoted at the assessment, before it starts. Document templates included.

Timelines

Home charging: assessment within 48 hours (RSD 3,500, credited toward the installation), installation in one working day. Companies and buildings: a reply within 48 hours, assessment by appointment. With an assembly decision: 4–10 weeks.

Subscription

RSD 990 a month, the first 2 months at RSD 0, no contract lock-in: billing, monitoring, 48-hour service, a winter check and an extended warranty. The kit works without a subscription too.

Electricity

Evolako does not sell electricity. Consumption is measured by a MID meter or by the charger itself, and the cost is billed at the price on the EPS bill, with no markup.

Warranty

The standard warranty is 2 years and applies without a subscription too. With a subscription, it lasts as long as the subscription.

Languages

We speak Serbian, Russian and English.

PARTNERSHIPS

How we can work together

Building managers and residents' associations

For a building we provide a technical description of the installation and templates for the residents' assembly: a draft decision, an agenda item, an owner's consent, answers to residents' questions and a checklist. The solution costs the building nothing: space owners pay for the connection, and each user pays for electricity by their own meter.

Companies and fleets

For company cars charged at employees' homes: a MID meter per space and a monthly consumption report for accounting.

Equipment makers and suppliers

Send offers, specifications and terms for wallboxes, meters and other equipment to hello@evolako.com.

Electric car dealers

A buyer who lives in an apartment building asks where they will charge before they buy. For the buyers you refer to us, we offer a garage assessment within 48 hours and an exact quote before anything is signed. Terms of cooperation are agreed individually.

Electricians

Installations are done by licensed electricians, to our standard, with our checklist and installation description. If you are a licensed electrician in Belgrade, Novi Sad or Vojvodina and would like to work with us, write to us.

English

SHORT

Evolako installs home chargers for electric cars in apartment-building garages and houses — with a MID-certified meter (in START and ZGRADA, optional with a wallbox) and monthly electricity billing with no markup. With the kit, residents get templates for the residents' assembly and the garage owner.

LONGER

Evolako solves electric car charging for people who live in apartment buildings. At a parking space or in a garage it installs a heavy-duty socket with a MID-certified meter or an 11 kW wallbox (MID meter optional), provides document templates for the residents' assembly or the garage owner, and every month bills electricity at the price on the EPS bill, with no markup. Packages with basic installation next to the distribution board start at RSD 39,000 including VAT, and installation takes one working day. Evolako works in Belgrade, Novi Sad and Vojvodina.

Srpski

SHORT

Evolako ugrađuje kućne punjače za električne automobile u garažama stambenih zgrada i kućama — sa MID brojilom (u START i ZGRADA, uz wallbox po izboru) i mesečnim obračunom struje bez marže. Uz komplet stanari dobijaju šablone za skupštinu i vlasnika garaže.

LONGER

Evolako rešava punjenje električnog automobila za ljude koji žive u zgradama. Na parking mesto ili u garažu ugrađuje pojačanu utičnicu sa sertifikovanim MID brojilom ili wallbox 11 kW (MID brojilo po izboru), daje šablone dokumenata za skupštinu stanara ili vlasnika garaže i svakog meseca obračunava struju po ceni sa računa EPS-a, bez marže. Paketi sa osnovnom ugradnjom pored razvodne table koštaju od 39.000 RSD sa PDV-om, a ugradnja traje jedan radni dan. Evolako radi u Beogradu, Novom Sadu i Vojvodini.

Русский

SHORT

Evolako устанавливает домашние зарядки для электромобилей в гаражах многоквартирных домов и в частных домах — с MID-счётчиком (в START и ZGRADA, к wallbox — по желанию) и ежемесячным расчётом за электричество без наценки. Вместе с комплектом жильцы получают шаблоны для собрания жильцов и владельца гаража.

LONGER

Evolako решает вопрос зарядки электромобиля для тех, кто живёт в многоквартирных домах. На парковочное место или в гараж устанавливается усиленная розетка с сертифицированным MID-счётчиком или wallbox на 11 кВт (MID-счётчик по желанию); Evolako даёт шаблоны документов для собрания жильцов или владельца гаража и каждый месяц рассчитывает электричество по цене из счёта EPS, без наценки. Пакеты с базовым монтажом рядом со щитком — от 39 000 RSD с НДС, установка занимает один рабочий день. Evolako работает в Белграде, Нови-Саде и Воеводине.
